

Technovation Girls in Taiwan

About the Event

Technovation is a global non-profit that empowers girls to become leaders, creators, and problem-solvers. Technovation Girls program aims at equipping young women (ages 8-18) to become tech entrepreneurs and leaders. With the support of mentors, girls work in teams to code mobile apps that address real-world problems.

This is the first year we are introducing the program to Taiwan, bringing top-tier international resources to Taiwan's STEM education community. Our goal is to leverage the existing global network with Technovation Girls to expose young Taiwanese talents to the competitive environment and further demonstrate the unique talent pool in Taiwan.

The main event, Technovation Girls, will take place from January to April 2024. We designed a full program to assist the selection of participants in Q4 2023, hoping we can get the most suitable students to represent Taiwan and get them onboard smoothly to the event.

Hosted by: AIT, American Spaces, Girls in Tech Taiwan

Partners: Youth Rock/ Startup Island Taiwan, Taipei City Government, New Taipei City Government, Kaohsiung City Government, Hepta Protocol, Microsoft, MediaTek, Foundation for Women's Rights Promotion and Development
